Features of the altec PowerSoftware
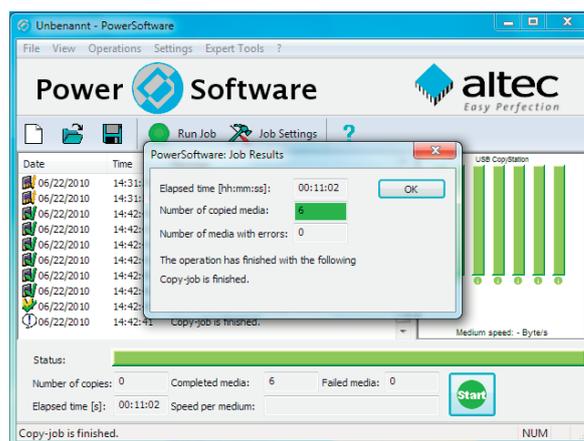

◆ Can be used to copy data from a Master Flash Media or an image file as a source.

◆ Time-saving **„Copy on Insertion™"** mode which starts the copying process automatically when the memory card is inserted and allows continuous copying; the altec „Parallel Copy" mode is also available. The copy process starts after the cards have been inserted and the start button has been activated.

◆ Software option **„ShortImage"** to create and copy **smaller image files**. With this option, memory cards with less data than the available capacity, can be duplicated faster and more efficiently.

◆ The software option **„File Copy"** copies only selected files without creating an image file. This results into a faster copy process, while copying a few smaller files only.

◆ **„DualWrite"** for using two different image files. This option can be easily used for testing images with special pattern etc..

◆ Wide range of **analyzing and logging features** for **optimizing the production process**.

  • date, time and logged in user
  • media serial number, CopyStation serial number
  • status of the slots and/or media
  • error massage separately for each slot
  • copy counter
  • state massages

◆ Multiuser mode with dedicated rights management.

◆ Automatic size adaptation and data integrity test of FAT formatted media to copy onto smaller media.

◆ **User Interface in German and English**; other languages on request.

◆ Software option **„WritePotect"** to set a temporary or permanent write protection flag on SD Card or MMC cards.

◆ **Interactive help file system** accessible from all main dialog boxes.

◆ Creation of **test images with special test pattern**.

Optional software interface for **data exchange with external applications**. This allows you to modify the data which is being copied, e.g. by assigning individual serial numbers or applying data encryption. Software Interface for **external serialization**.

In addition, the PowerSoftware can be modified to meet custom requirements. Special test programs for flash memory cards are also available. Please contact altec for further information.
